IMPORTANT Recap From Last Two Power Points:

- There is NO SARS COV 2 virus that causes Covid 19.
- Since there is no virus, hence there is also NO SPIKE PROTEIN. The Spike protein is FICTION produced on a COMPUTER. It does NOT EXIST IN REALITY.
- The virus hoax was started in Wuhan, China as an "In Silico" computer generated genome cobbled up from fusing together of several other genomes such as HIV, SARS COV 1 and MERS viruses, which then was uploaded worldwide onto a database called "BLAST P" where scientists could view the 30,000 to 40,000 base pairs FICTITIOUS viral genome.
- The PCR test put together by German scientists Christian Drosten and Victor Corman was programmed with HUMAN RNA from patient zero in Wuhan, China, not VIRAL RNA, hence the 97% false positive rate on the PCR. People are testing positive because they're human. People are also testing positive because of the high threshold cycle rates employed which were as high as 50 cycles, instead of the customary 25 to 30 threshold cycles.

Where and When were the Covid 19 Injections Made?

- Covid 19 the "Scamdemic" was a SMOKESCREEN to usher in the depopulation agenda and technocratic control mechanism, through the Covid 19 injections.
- According to the magazine "Business Insider", the Pfizer and Moderna injections were made in one day over a weekend (Remember Fauci saying they were SAFE and EFFECTIVE?):
<https://www.businessinsider.com/pfizer-biontech-vaccine-designed-in-hours-one-weekend-2020-12>
- According to the co-founder of BioNtech, the Pfizer injections were made in JANUARY 2020 within a few hours (how do you make a vaccine for a virus that was never isolated or purified or even known before the official pandemic date in March 2020? You don't, this whole thing was pre-planned years in advance).
- According to Business Insider, the Pfizer vaccine was made in a few hours (source link above): "But perhaps most remarkably, BioNTech co-founder Ugur Sahin designed the vaccine in just a few hours in mid-January, [according to The Journal](#), a [podcast](#) from Gimlet and The Wall Street Journal."

18 Scientists Worldwide Testing All the Different Brands of Covid 19 Injections:

- Our group of 18 scientists, currently as of August 23, 2022, started out as a group of only 4 scientists in late January 2021 on the testing of the Covid 19 injections. Collectively as more scientists joined the group through 2021, 18 scientists have now tested 2305 vials (as of August 23, 2022) of the following Covid 19 injections from all over the world since November/December 2020 when the injections first rolled out:
- 1. Pfizer/BioNtech/Cominarty, 2. Moderna, 3. Johnson & Johnson (J&J), 4. Novavax, 5. AstraZeneca, 6. Sinopharm (China), 7. Sinovac (China), 8. Covishield (Homegrown version of AstraZeneca made in India), 9. Soberana 02 (Cuba), 10. Pasto Covac (Iran), 11. CanSino (China), 12. ZifiVax (China)

Techniques Used to Study the Ingredients of the Covid 19 Injections:

- All of us in our group have employed toxicology techniques to study the biologics and the biochemistry within the injections such as mRNA, spike proteins and subunits, amino acid concentrations, protein concentration, emulsifiers, lipids, pseudo viruses and viral vectors etc.
- We employed specialized forms of live microscopy whenever possible to see the nano particulate and reduced graphene oxide. In some cases Scanning Electron Microscopy (SEM) was employed to get higher effective forms of magnification at 12,000 to 15,000x magnification for more clarity.
- But mostly, we used a technique called Raman Microscopy which is a laser based microscope. Very effective to study molecules like graphene:

- **Novavax Injection (United States) contains:** NVX-CoV2373 has been described as both a protein subunit vaccine and a virus-like particle vaccine, though the producers call it a "recombinant nanoparticle vaccine". The vaccine is produced by creating an engineered baculovirus containing a gene for a modified SARS-CoV-2 spike protein. The spike protein was modified by incorporating two proline amino acids in order to stabilize the pre-fusion form of the protein; this same 2P modification is being used in several other COVID-19 vaccines. The baculovirus is made to infect a culture of Sf9 moth cells, which then create the spike protein and display it on their cell membranes. The spike proteins are harvested and assembled onto a synthetic lipid nanoparticle about 50 nanometers across, each displaying up to 14 spike proteins. The formulation includes a saponin-based adjuvant named Matrix-M.

What are the "REAL" Contents of all these 12 Injections after testing them?

- Per our testing of all these injections since February 2021 and even earlier with some of the scientists in our group, the **ACTUAL contents** of all these injections is **IDENTICAL TO EACH OTHER**. All the injections are identical, but with different brand names like Pfizer, Moderna etc. with minor differences in adjuvants and synthetic lipid nano particles. THERE were NO biologics in any of the injections tested, meaning there was **ZERO biological** material found such as mRNA, spike protein subunits, pseudovirus vectors etc. These injections are deadly **CHEMICAL COCKTAILS**, NOT a bioweapon, but a chemical weapon. The ingredients are as follows:
- 1. Adjuvants (which are preservatives which is mostly Aluminum hydroxide, and a few others), 2. Sucrose (sugar), 4. Sodium Chloride (salt), 5. Water, 6. Synthetic lipid nano particles such PEG and SM 102, 7. Hydrogel (Polymer Nanoparticle called PNP), 8. Trillions of nano particles of reduced graphene oxide, 9. Trillions of particles of nano particulate of heavy metal contamination.
- Uses of hydrogel in vaccines: <https://www.news-medical.net/news/20210406/Novel-hydrogel-based-vaccine-formulation-shows-high-efficacy-against-SARS-CoV-2.aspx>

Slide 22 [timestamp 00:54:34]

How do Each of These Toxic Ingredients Affect our Bodies?

- 1. Polymers and hydrogels are used as nano antennas as they have magnetic properties and also have the ability to self crystallize into nano structures of sorts. Hydrogel was also found on the PCR swabs in copious quantities under close examination through a microscope.
- 2. Reduced graphene oxide is a stable compound that is highly magnetic, thermodynamic and has a positive pizo-electric charge to it. It is stable and does not disintegrate into smaller particles in the body.

How do Each of These Toxic Ingredients Affect our Bodies?

- 3. Synthetic lipid nano particles such as PEG (Polyethylene Glycol) and SM 102 are highly inflammatory substances for the body, sometimes causing the body to go into anaphylactic shock. They are highly carcinogenic and cancer causing substances.

Slide 24 [timestamp 01:00:51]

How do Each of These Toxic Ingredients Affect our Bodies?

- 5. There was MASSIVE contamination in the Covid 19 injections through heavy metal particulate such as tungsten, chromium, iron, sodium (highly electro conductive), strontium, magnesium, gold and silver nano particulates, lead, antimony, aluminum, tin and many others. This heavy metal sludge is very stable and is attracted to fat tissue in the body and gets deposited there causing repeated irritation and inflammation in the body leading to disease and degeneration of the body. **See this paper on heavy nano metal contamination of childhood vaccines:** <https://medcraveonline.com/IJVV/IJVV-04-00072.pdf>
- 6. Reduced graphene oxide because of its positive magnetic and electric charge literally SHORT CIRCUITS the insides of the human body causing massive inflammation and degeneration of tissues. Graphene is known to get attracted to the the negatively charged organs, blood vessels and nervous system and completely damage the electrical activity of the body. Hence, we're seeing a whopping increase in myocarditis, pericarditis, strokes, clots, heart attacks, and seizures in vaccinated people. The electrical activity in the body is getting completely disrupted, and the body in most cases responds with massive systemic inflammation causing eventual degeneration and death.

Slide 25 [timestamp 01:03:43]

What is the End Game of these IDENTICAL Covid 19 Injections?

- Since ALL the injections tested all over the world were nearly identical with the same ingredients list of chemicals, heavy metals, hydrogel, synthetic lipid nanos and trillions of particles of REDUCED graphene oxide under different brand names such as Pfizer, Moderna, Sinopharm etc. with NO BIOLOGICS in the injections, it is safe to say this injection and booster scheme was deployed as a depopulation tactic and thereafter technocratic totalitarian control of the leftover population on the planet.
- This is why boosters are given, as each successive wave of injections weakens the body progressively and cuts life spans into a fraction after each dose. This is also why the parasites in charge masquerading as government are encouraging mixing and matching of boosters for all the injections, because every single injection for Covid is IDENTICAL and has the same ingredients made to kill and maim the body.

Slide 26 [timestamp 01:08:53]

Some Very Important Facts:

1. We tested a batch of 15 flu injections in 2021 and 2022 and what we found was horrific: These are identical in ingredients to the Covid 19 injections. This might be another reason why the UNVACCINATED are also getting sick as they got a dose of reduced graphene oxide and other nano particulate in their system. I firmly believe that a contaminated flu jab was partially responsible for people getting very sick in Wuhan in October/November 2019. It had nothing to do with a virus.
2. We also tested a few child Covid 19 injections (10 vials to be specific). The children are getting the IDENTICAL adult injection. There is NO DIFFERENCE in ingredients whatsoever. In rare cases, the child gets the same dosage of 0.5 mL that is given to an adult.

Slide 27 features a blue header with the title "Some Very Important Facts:". Below the header, on a light grey background, is a bulleted list. The first bullet point is a paragraph discussing the variability of toxicity in COVID-19 injections, mentioning the Median Lethal Dose (LD 50) and the team's findings of 35 different variations in toxicity levels. The second bullet point is a source link.

Some Very Important Facts:

- 3. It is crucial to remember that each injection administered has different levels of toxicity. In science we call this dosage variability a "Median Lethal Dose," or LD 50. Meaning the toxic dose and duration it takes to kill half the population with a toxin. In the case of the Covid 19 injections, the variability of the lethal toxic dose was fairly spread out because of the high variability of permutations and combinations of the toxic substances used and the amounts used in each injection. For example, although the basic ingredient list of toxins is IDENTICAL, the specific amount of a particular substance may vary widely from injection to injection. So one injection might have very high amounts of reduced graphene oxide and synthetic lipid nanos, while another might have more heavy metals and less graphene oxide and so on. **Our team has presently found 35 different variations in toxicity levels in the injections, ranging from mildly toxic to highly toxic and everything in between.** This is why some people die within weeks to months of being injected, while others look fine temporarily without any OVERT symptoms of toxicity. However, ultimately these injections will cause long term damage in every person who takes the injection and cut their lifespan by at least 10 to 15 years on the average. We also have not found any placebos in the vials examined so far, which leads us to believe there were NO PLACEBOS given.
- Source: https://en.wikipedia.org/wiki/Median_lethal_dose

Slide 28 [timestamp 01:15:55]

Slide 28 features a blue header with the title "The Story Behind 'VACCINE SHEDDING' Myth or Reality?". Below the header, on a light grey background, is a bulleted list. The first bullet point is a paragraph explaining that COVID-19 injections are identical and are a deadly chemical cocktail, not a biological weapon. The second bullet point is a numbered list item explaining that biological matter is excreted and flushed out, and that toxins become inert and inactive, hence, one cannot shed proteins like the spike protein (FICTION) or mRNA or even graphene oxide.

The Story Behind "VACCINE SHEDDING" Myth or Reality?

- Now that we've learned that each of the Covid 19 injections all over the world is identical to the other injections floating around, and that they're all a deadly chemical cocktail and NOT a biological weapon as imagined, we must understand how the body deals with toxins.
- 1. All biological matter be it amino acids, proteins or organic material that is foreign to the body will be excreted out and flushed out. This is a detoxification mechanism, whether from the skin, nose or any other part of the body. However, the body processes everything and when excreted out, the toxins become inert and inactive. **Hence, one cannot shed proteins like the spike protein (FICTION) or mRNA or even graphene oxide.** You cannot infect anyone else by shedding. The body cannot shed or contaminate someone else. Proteins get destroyed the moment they come in contact with the air and oxygen. It's called "denaturing" or falling apart of biological matter.

Slide 29 [timestamp 01:18:19]

The Story Behind "VACCINE SHEDDING" Myth or Reality?

- The only way to kill or maim someone is to INJECT them directly into the bloodstream with a toxin. This is why in nature every animal INJECTS their toxin into us in order to harm us, whether it is a snake through its fangs, a wasp or bee through its stinger or a mosquito who injects an itchy toxin into our blood stream. We cannot die from inhaling, shedding or being sprayed on unless it is massive amounts of literally burying you in the toxin. The only sure fire way to maim and kill you is to INJECT you. The parasites know this and this why they want every human being injected with the Covid 19 jab.
- When the unvaccinated feel nauseous, or get a headache or nosebleeds around the vaccinated, it is through a process called "bioresonance" where our bodies communicate with each other through other forms of communication not yet understood besides actual verbal communication. The more intimate the human relationship, the higher the level of bio resonance. All this is stuff we will ultimately discover as we move forward into a more enlightened age of reasoning from the PRESENT dark age of Big Pharma and PHONY BALONEY science.

Slide 30 [timestamp 01:22:31]

In Conclusion:

- Covid 19 was a blessing in disguise. I say this with the utmost sincerity, because now we can truly tackle the horrific nature of topics such as vaccine damage, death through vaccines, Big Pharma monopoly on human health, destruction of human health for the last 120 years or more solely from generational vaccine damage to our bodies, chromosomes and mitochondria.
- Every scamdemic is the same story of rinse and repeat. It is ultimately about a MASSIVE CULL and a complete RESET through depopulation, economic and social devastation. However, this time the RESET is on the side of humanity and the PARASITES are on their last leg of desperation. Please hang in there, fight hard, NEVER COMPLY, be resilient and know that we have a GOLDEN AGE ahead of us in VERY SHORT ORDER. Now is not the time to give up!

IMPORTANT Recap from Last Two Power Points:

- There is NO SARS COV 2 virus that causes Covid-19.
- Since there is no virus, hence there is also NO SPIKE PROTEIN. The Spike protein is FICTION produced on a COMPUTER. It does NOT EXIST IN REALITY.
- The virus hoax was started in Wuhan, China as an "In Silico" computer-generated genome cobbled up from fusing together of several other genomes such as HIV, SARS COV 1 and MERS viruses, which then was uploaded worldwide onto a database called "BLAST P" where scientists could view the 30,000 to 40,000 base pairs FICTITIOUS viral genome.
- The PCR test put together by German scientists Christian Drosten and Victor Corman was programmed with HUMAN RNA from patient zero in Wuhan, China, not VIRAL RNA, hence the 97% false positive rate on the PCR. People are testing positive because they're human. People are also testing positive because of the high threshold cycle rates employed which were as high as 50 cycles, instead of the customary 25 to 30 threshold cycles.

Where and When were the Covid-19 Injections Made?

- Covid-19 the "Scamdemic" was a SMOKESCREEN to usher in the depopulation agenda and technocratic control mechanism, through the Covid-19 injections.

- According to the magazine "Business Insider" the Pfizer and Moderna injections were made in one day over a weekend (Remember Fauci saying they were SAFE and EFFECTIVE?):
<https://www.businessinsider.com/pfizer-biontech-vaccine-designed-in-hours-one-weekend-2020-12?r=US&IR=T>
- According to the co-founder of BioNTech, the Pfizer injections were made in JANUARY 2020 within a few hours (how do you make a vaccine for a virus that was never isolated or purified or even known before the official pandemic date in March 2020? You don't, this whole thing was pre-planned years in advance).
- According to Business Insider, the Pfizer vaccine was made in a few hours (source link above): "But perhaps most remarkably, BioNTech co-founder Ugur Sahin designed the vaccine in just a few hours in mid-January, [according to The Journal](#), a [podcast](#) a from Gimlet and The Wall Street Journal."

18 Scientists Worldwide Testing All the Different Brands of Covid-19 Injections:

- Our group of 18 scientists, currently as of August 23, 2022, started out as a group of only 4 scientists in late January 2021 on the testing of the Covid-19 injections. Collectively, as more scientists joined the group through 2021, 18 scientists have now tested 2305 vials (as of August 23, 2022) of the following Covid-19 injections from all over the world since November/December 2020 when the injections first rolled out:
- Pfizer/BioNTech/Cominarty, 2. Moderna, 3. Johnson & Johnson (J&J), 4. Novavax, 5. AstraZeneca, 6. Sinopharm (China), 7. Sinovac (China), 8. Covishield (Homegrown version of AstraZeneca made in India), 9. Soberana 02 (Cuba), 10. Pasto Covac (Iran), 11. CanSino (China), 12. ZifiVax (China)

Slide 7

Techniques Used to Study the Ingredients of the Covid-19 Injections:

- All of us in our group have employed toxicology techniques to study the biologics and the biochemistry within the injections such as mRNA, spike proteins and subunits, amino acid concentrations, protein concentration, emulsifiers, lipids pseudoviruses and viral vectors etc.
- We employed specialized forms of live microscopy whenever possible to see nanoparticulate and reduced graphene oxide. In some cases, Scanning Electron Microscopy (SEM) was employed to get higher effective forms of magnification at 12,000 to 15,000x magnification for more clarity.
- But mostly, we used a technique called Raman Microscopy which is a laser-based microscope. Very effective to study molecules like graphene:

The "OFFICIAL" Story on the Contents of the SAFE and EFFECTIVE Injections:

- **Pfizer/BioNTech Injection (United States):** The [full list of ingredients for the Pfizer vaccine](#) is: mRNA, lipids (4-hydroxybutyl)azanediylbis(hexane-6,1-diylbis(2-hexyldecanoate), 2[(polyethylene glycol)-2000]-N, N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3-phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose.
The Pfizer vaccine does not contain eggs, preservatives, or latex.
- **Moderna Injection (United States):** The [full list of ingredients for the Moderna vaccine](#) is: Messenger ribonucleic acid (mRNA), lipids (SM-102, polyethylene glycol [PEG] 2000 dimyristoyl glycerol [DMG] cholesterol, and 1,2-distearoyl-sn-glycero-3-phosphocholine [DSPC]), tromethamine, tromethamine hydrochloride, acetic acid, sodium acetate trihydrate, and sucrose.
The Moderna vaccine does not contain eggs, preservatives, or latex.

- **Novavax Injection (United States) contains:** NVX-CoV2373 has been described as both a protein [subunit vaccine](#) and a [virus-like particle](#) vaccine, though the producers call it a "recombinant nanoparticle vaccine". The vaccine is produced by creating an engineered [baculovirus](#) containing a gene for a modified [SARS-CoV-2 spike protein](#). The spike protein was modified by incorporating two [proline](#) amino acids in order to stabilize the pre-fusion form of the protein; this same 2P modification is being used in several other COVID-19 vaccines. The baculovirus is made to infect a [culture](#) of [Sf9 moth](#) cells, which then create the spike protein and display it on their [cell membranes](#). The spike proteins are harvested and assembled onto a synthetic [lipid nanoparticle](#) about 50 nanometers across, each displaying up to 14 spike proteins. The formulation includes a saponin-based [adjuvant](#) named [Matrix-M](#).

- **AstraZeneca Injection (Oxford/UK) contains:**
- One dose (0.5 ml) contains: COVID-19 Vaccine (ChAdOx1-S* recombinant) 5×10^{10} viral particles (vp). Recombinant, replication-deficient chimpanzee adenovirus vector encoding the SARS-CoV-2 Spike glycoprotein. Produced in genetically modified human embryonic kidney (HEK) 293 cells. The other excipients are: L-histidine, L-histidine hydrochloride monohydrate, magnesium chloride hexahydrate, polysorbate 80 (E 433), ethanol, sucrose, sodium chloride, disodium edetate dihydrate, water for injections. This product contains genetically modified organisms (GMOs).

Initially, a sample of [SARS-CoV-2](#) strain 19nCoV-CDC-Tan-HB02 (HB02) from China capable of rapid multiplication was chosen. Then, it was used to grow large quantities of the virus using [vero cells](#). From then on, the viruses are soaked in [beta-propiolactone](#), which deactivates them by

- **Soberana 2 Injection (Finlay Institute, Cuba) ingredient list:**
- FINLAY-FR-2 is a [conjugate vaccine](#). It consists of the receptor binding domain of the SARS-CoV-2 [spike protein](#) conjugated chemically to [tetanus toxoid](#) (tetanus bacterial vaccine). Professor Ihosvany Castellanos Santos said that the antigen is safe because it contains parts instead of the whole live virus, and therefore it does not require extra refrigeration, like other candidates in the world. The spike protein subunit is produced in [Chinese hamster ovary cell](#) culture. **Pasto Covac injection produced in Iran is identical to Soberana 2 as far as "OFFICIAL" ingredients are concerned.**

- **CanSino Injection (China):** Developed by CanSino Biologics, Convidecia is a **viral vector vaccine**, that uses a modified Ad5 virus to deliver the blueprint for the SARS-CoV-2 protein spike. It uses a modified Ad5 virus containing the DNA instructions for the protein spikes of the SARS-CoV-2. Once injected, the Ad5 virus introduces the SARS-CoV-2 protein spike DNA to the cell nucleus, where it is decoded to create the mRNA instructions.

- Here is a link to all the different types of injections all over the world and the "official" story of how they work in the body: <https://covid-19pharmacovigilance.paho.org/>
- Zifivax, according to this source BELOW, is a protein subunit vaccine using a dimeric form of the receptor-binding domain (RBD) as the antigen, a harmless piece of the SARS-Cov-2 virus (THE FICTION VIRUS THAT DOES NOT EXIST IN REALITY).

Slide 21

What are the "REAL" Contents of all these 12 Injections after testing them?

- Per our testing of all these injections since February 2021 and even earlier with some of the scientists in our group, the **ACTUAL contents** of all these injections is **IDENTICAL TO EACH OTHER**. All the injections are identical, but with different brand names like Pfizer, Moderna etc. with minor differences in adjuvants and synthetic lipid nanoparticles. THERE were NO biologics in any of the injections tested, meaning there was **ZERO biological** material found such as mRNA, spike protein subunits, pseudovirus vectors etc. These injections are deadly **CHEMICAL COCKTAILS**, NOT a bioweapon, but a chemical weapon. The ingredients are as follows:
- 1. Adjuvants (which are preservatives which is mostly aluminium hydroxide, and a few others), 2. Sucrose (sugar), 4. Sodium Chloride (salt), 5. Water, 6. Synthetic lipid nanoparticles such as PEG and SM 102, 7. Hydrogel (Polymer Nanoparticle called PNP), 8. Trillions of nanoparticles of reduced graphene oxide, 9. Trillions of particles of nanoparticulate of heavy metal contamination.
- Uses of hydrogel in vaccines: <https://www.news-medical.net/news/20210406/Novel-hydrogel-based-vaccine-formulation-shows-high-efficacy-against-SARS-CoV-2.aspx>

Slide 22

How do Each of These Toxic Ingredients Affect our Bodies?

- Polymers and hydrogels are used as nanoantennas as they have magnetic properties and also have the ability to self-crystallize into nanostructures of sorts. The hydrogel was also found on the PCR swabs in copious quantities under close examination through a microscope.
- Reduced graphene oxide is a stable compound that is highly magnetic, thermodynamic and has a positive piezo-electric charge to it. It is stable and does not disintegrate into smaller particles in the body.

<https://rumble.com/v1h9piz-the-jab-its-poison-and-will-kill-you.html>

- 3. Synthetic lipid nanoparticles such as PEG (Polyethylene Glycol) and SM 102 are highly inflammatory substances for the body, sometimes causing the body to go into anaphylactic shock. They are highly carcinogenic and cancer-causing substances.
- <https://eg98a92bhi8.exactdn.com/wp-content/uploads/2021/05/SM-102-Ingredient-OSHA-Safety-Warning.pdf>
- 4. Toxicity of PEG: <https://www.jillcarnahan.com/2022/03/03/is-polyethylene-glycol-peg-toxic-a-look-at-its-known-and-emerging-side-effects/>

Slide 24

How do Each of These Toxic Ingredients Affect our Bodies?

- 5. There was MASSIVE contamination in the Covid-19 injections through heavy metal particulates such as tungsten, chromium, iron, sodium (highly electro-conductive), strontium, magnesium, gold and silver nano particulates, lead, antimony, aluminium, tin and many others. This heavy metal sludge is very stable and is attracted to fat tissue in the body and gets deposited there causing repeated irritation and inflammation in the body leading to disease and degeneration of the body. **See this paper on heavy nano metal contamination of childhood vaccines:** <https://medcraveonline.com/IJVV/IJVV-04-00072.pdf>
- 6. Reduced graphene oxide because of its positive magnetic and electric charge literally SHORT CIRCUITS the insides of the human body causing massive inflammation and degeneration of tissues. Graphene is known to get attracted to the negatively charged organs, blood vessels and nervous system and completely damage the electrical activity of the body. Hence, we're seeing a whopping increase in myocarditis, pericarditis, strokes, clots, heart attacks, and seizures in vaccinated people. The electrical activity in the body is getting completely disrupted, and the body in most cases responds with massive systemic inflammation causing eventual degeneration and death.

Slide 25

What is the End Game of these IDENTICAL Covid-19 Injections?

- Since ALL the injections tested all over the world were nearly identical with the same ingredients list of chemicals, heavy metals, hydrogel, synthetic lipid nanos and trillions of particles of REDUCED graphene oxide under different brand names such as Pfizer, Moderna, Sinopharm etc. with NO BIOLOGICS in the injections, it is safe to say this injection and booster scheme was deployed as a depopulation tactic and thereafter technocratic totalitarian control of the leftover population on the planet.
- This is why boosters are given, as each successive wave of injections weakens the body progressively and cuts life spans into a fraction after each dose. This is also why the parasites in charge masquerading as government are encouraging mixing and matching of boosters for all the injections, because every single injection for Covid is IDENTICAL and has the same ingredients made to kill and maim the body.

Slide 26

Some Very Important Facts:

- We tested a batch of 15 flu injections in 2021 and 2022 and what we found was horrific: These are identical in ingredients to the Covid-19 injections. This might be another reason why the UNVACCINATED are also getting sick as they got a dose of reduced graphene oxide

'Scamdemic Part 3' Presented by Poornima Wagh

Regis Tremblay with Poornima Wagh: The Jab - It's Poison and Will Kill You, 25 August 2022 (87 mins)

and other nanoparticulate in their system. I firmly believe that a contaminated flu jab was partially responsible for people getting very sick in Wuhan in October/November 2019. It had nothing to do with a virus.

- We also tested a few child Covid-19 injections (10 vials to be specific). The children are getting the IDENTICAL adult injection. There is NO DIFFERENCE in ingredients whatsoever. In rare cases, the child gets the same dosage of 0.5 mL that is given to an adult.

Slide 27

Some Very Important Facts:

- 3. It is crucial to remember that each injection administered has different levels of toxicity. In science, we call this dosage variability a "Median Lethal Dose," or LD 50. Meaning the toxic dose and duration it takes to kill half the population with a toxin. In the case of the Covid-19 injections, the variability of the lethal toxic dose was fairly spread out because of the high variability of permutations and combinations of the toxic substances used and the amounts used in each injection. For example, although the basic ingredient list of toxins is IDENTICAL, the specific amount of a particular substance may vary widely from injection to injection. So, one injection might have very high amounts of reduced graphene oxide and synthetic lipid nanos, while another might have more heavy metals and less graphene oxide and so on. **Our team has presently found 35 different variations in toxicity levels in the injections, ranging from mildly toxic to highly toxic and everything in between.** This is why some people die within weeks to months of being injected, while others look fine temporarily without any OVERT symptoms of toxicity. However, ultimately these injections will cause long-term damage in every person who takes the injection and cut their lifespan by at least 10 to 15 years on the average. We also have not found any placebos in the vials examined so far, which leads us to believe there were NO PLACEBOS given.
- Source: https://en.wikipedia.org/wiki/Median_lethal_dose

Slide 28

The Story Behind "VACCINE SHEDDING" Myth or Reality?

- Now that we've learned that each of the Covid-19 injections all over the world is identical to the other injections floating around, and that they're all a deadly chemical cocktail and NOT a biological weapon as imagined, we must understand how the body deals with toxins.
- All biological matter be it amino acids, proteins or organic material that is foreign to the body will be excreted out and flushed out. This is a detoxification mechanism, whether from the skin, nose or any other part of the body. However, the body processes everything and when excreted out, the toxins become inert and inactive. **Hence, one cannot shed proteins like the spike protein (FICTION) or mRNA or even graphene oxide.** You cannot infect anyone else by shedding. The body cannot shed or contaminate someone else. Proteins get destroyed the moment they come in contact with the air and oxygen. It's called "denaturing" or falling apart of biological matter.

Slide 29

The Story Behind "VACCINE SHEDDING" Myth or Reality?

- The only way to kill or maim someone is to INJECT them directly into the bloodstream with a toxin. This is why in nature every animal INJECTS their toxin into us in order to harm us,

'Scamdemic Part 3' Presented by Poornima Wagh

Regis Tremblay with Poornima Wagh: The Jab - It's Poison and Will Kill You, 25 August 2022 (87 mins)

<https://rumble.com/v1h9piz-the-jab-its-poison-and-will-kill-you.html>

whether it is a snake through its fangs, a wasp or bee through its stinger or a mosquito that injects an itchy toxin into our bloodstream. We cannot die from inhaling, shedding or being sprayed on unless it is massive amounts of literally burying you in the toxin. The only surefire way to maim and kill you is to INJECT you. The parasites know this and this is why they want every human being injected with the Covid-19 jab.

- When the unvaccinated feel nauseous, or get a headache or nosebleeds around the vaccinated, it is through a process called "bioresonance" where our bodies communicate with each other through other forms of communication not yet understood besides actual verbal communication. The more intimate the human relationship, the higher the level of bioresonance. All this is stuff we will ultimately discover as we move forward into a more enlightened age of reasoning from the PRESENT dark age of Big Pharma and PHONY BALONEY science.

Slide 30

- Covid-19 was a blessing in disguise. I say this with the utmost sincerity, because now we can truly tackle the horrific nature of topics such as vaccine damage, death through vaccines, Big Pharma's monopoly on human health, destruction of human health for the last 120 years or more solely from generational vaccine damage to our bodies, chromosomes and mitochondria.
- Every scamdemic is the same story of rinse and repeat. It is ultimately about a MASSIVE CULL and a complete RESET through depopulation, economic and social devastation. However, this time the RESET is on the side of humanity and the PARASITES are on their last leg of desperation. Please hang in there, fight hard, NEVER COMPLY, be resilient and know that we have a GOLDEN AGE ahead of us in VERY SHORT ORDER. Now is not the time to give up!
